

Message in sound

Problem: Is there anything inside of this sounds file

Hint: What's frequency of voice?

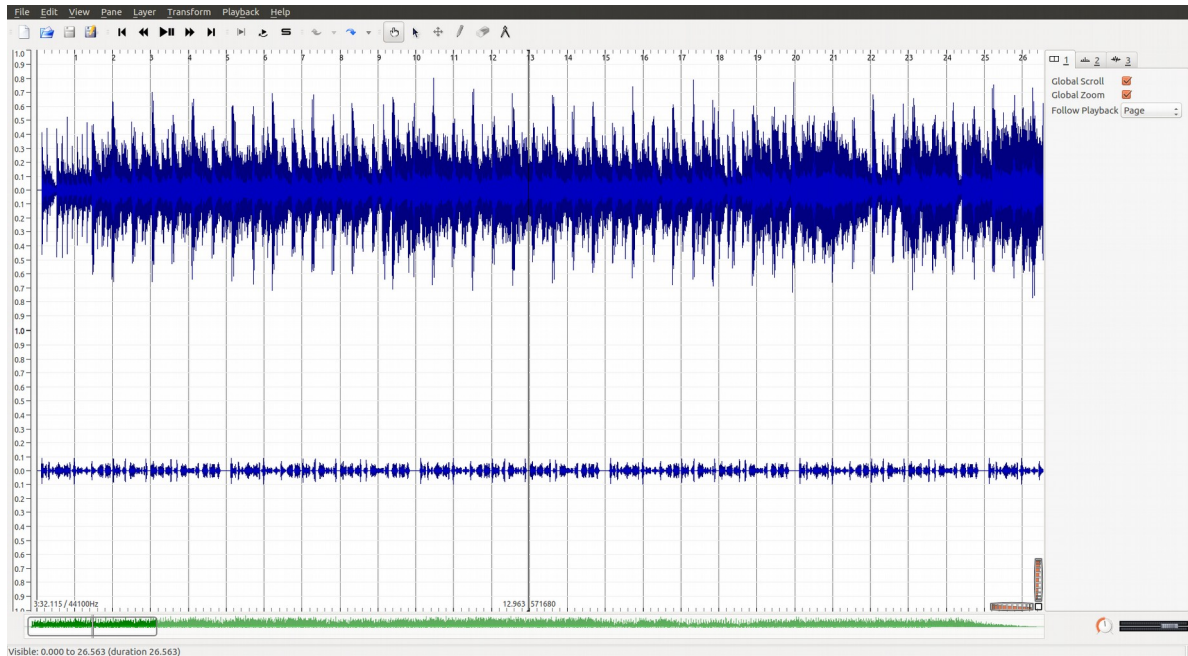

Given: Rolled.wav

Note: Recommended to use Sonic Visualizer for ease of use. Audacity has more features for advanced users.

Steps:

1) Given a wav format sound file. When opened it plays like any other sound file.

2) Open the file with Sonic Visualizer and notice that there are two distinct audio channels. The two audio channels look very different from each other. If you look closely on the second channel the waves are repeating. But, if you listen to the two channels separately, there is nothing useful.

3) The hint states “what's frequency of voice?”. So, let us look into the frequency of the sound. From the menu select Layer -> Add Spectrogram -> Channel2 ...
